

## Robot Wellness Visit

Complete Preventative Maintenance Service for your Robotic System

Your trusted partner in automation

INTEGRATED | INTELLIGENT | INTERACTIVE

### Robot Wellness Visit

During the day long visit, an Omron certified Field Service Engineer will perform all recommended factory maintenance activities and complete a comprehensive inspection of your robot.

### Complete Assessment

At the completion of the inspection, you will be given a report that documents the details of the service along with a list of any additional repairs or services needed to maintain your robot.

### Values and Benefit

- Maintain the value of initial Robot investment
- Decrease likelihood of expensive repairs with annual visits
- Have confidence that your system is well maintained
- Reduce the risk of unplanned production downtime

Protect your  
Robotic  
Investment!

Schedule by March 31 2018 and receive an Encoder Battery at no charge

With our more than 80 years of industry experience, Omron understands automation, applications and safety.
