### INSTRUCTION MANUAL

● Confirm if the item meets your needs.
● Before the use, you should first thoroughly read this manual and operate correctly as mentioned.
● You should keep this manual at hand for proper use.

Carefully read and understand the safety precautions before operation. The important information is provided to protect your health and property. Do not apply any other installing or operating procedure other than that

#### Meanings of Safety Symbol

| ⚠ WARNING | Indicates a possible hazard that may result in death, serious injury, WARNINGS or serious property damage if the product is used without observing the stated instructions. |
|---|---|

⚠ WARNING     Mandatory Requirements

● The light source of this product applies the visible light semiconductor laser. Do not allow the laser beam to enter an eye, either directly or reflected from reflective object. If the laser beam enters an eye, it may cause blindness.
● Do not disassemble or modify the product since it is not designed to automatically stop the laser emission when open. Disassembling or modifying at customer's end it may cause personal injury, fire or electric shock.
● This product is not an explosion proof construction. Do not use the product under flammable , explosive gas or liquid environment.
● Use of controls or adjustments or performance of procedures other

⚠ WARNING   Safety Precautions

● It is dangerous to wire or attach/remove the connector with the power on. Make sure to turn off the power before operation.
●Installing in the following places may result in malfunction:
　1. A dusty or steamy place
　2. A place generating corrosive gas
　3. A place directly receiving scattering water or oil.
　4. A place suffered from heavy vibration or impact.
●The product is not designed for outdoor use.
●Do not use the sensor in a transient state at power on（Approx. 15min. Warm up period）
●Do not wire with the high voltage cable or the power lines.
　Failure to do this will cause malfunction by induction or damage.
●Do not use the product in water.
●Operate within the rated range.
● Wipe off dirt on the emitting/receiving parts to maintain correct detection. Also, avoid  direct impact on the product.
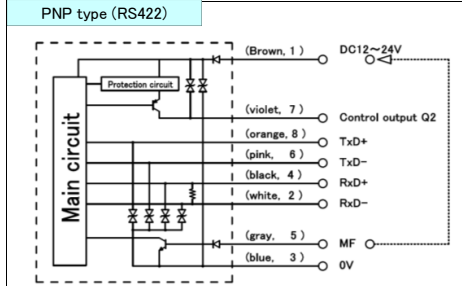

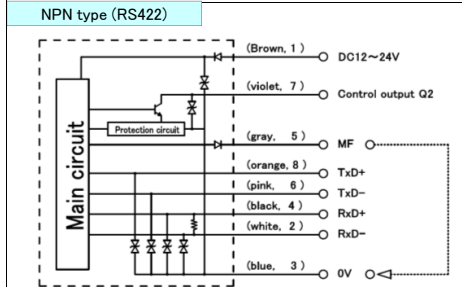

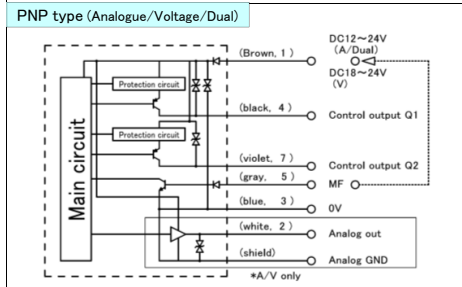

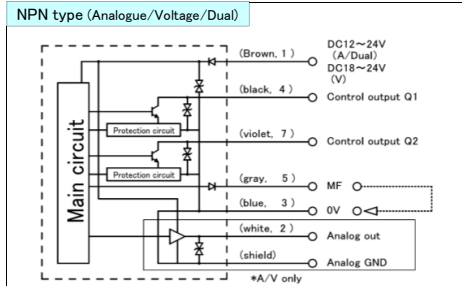

●**This product cannot be used as a safety device to protect human body.**
## Precautions for using laser

■Laser label
 This product is classified as Class 2（Ⅱ）Laser Product by JIS C6802/IEC/FDA Laser Safety Standard.

●Regulations in the USA
 When exporting laser devices to the USA, the USA laser control, FDA (Food and Drug Administration) is applied. This product has been already reported to CDRH (Center for Devices and Radiological Health). For details, contact our customer service.

## Connection diagram

### NPN type (Analogue/Voltage/Dual)

| | |
|---|---|
| (Brown, 1 ) | DC12～24V (A/Dual) DC18～24V (V) |
| (black, 4 ) | Control output Q1 |
| (violet, 7 ) | Control output Q2 |
| (gray, 5 ) | MF |
| (blue, 3 ) | 0V |
| (white, 2 ) | Analog out |
| (shield) | Analog GND |

*A/V only

### PNP type (Analogue/Voltage/Dual)

| | |
|---|---|
| (Brown, 1 ) | DC12～24V (A/Dual) DC18～24V (V) |
| (black, 4 ) | Control output Q1 |
| (violet, 7 ) | Control output Q2 |
| (gray, 5 ) | MF |
| (blue, 3 ) | 0V |
| (white, 2 ) | Analog out |
| (shield) | Analog GND |

*A/V only

### NPN type (RS422)

| | |
|---|---|
| (Brown, 1 ) | DC12～24V |
| (violet, 7 ) | Control output Q2 |
| (gray, 5 ) | MF |
| (orange, 8 ) | TxD+ |
| (pink, 6 ) | TxD− |
| (black, 4 ) | RxD+ |
| (white, 2 ) | RxD− |
| (blue, 3 ) | 0V |

### PNP type (RS422)

| | |
|---|---|
| (Brown, 1 ) | DC12～24V |
| (violet, 7 ) | Control output Q2 |
| (orange, 8 ) | TxD+ |
| (pink, 6 ) | TxD− |
| (black, 4 ) | RxD+ |
| (white, 2 ) | RxD− |
| (gray, 5 ) | MF |
| (blue, 3 ) | 0V |

### Pins configuration

### Caution for connection

Analog ground wire is not equipped for connector type. Therefore connect the analog ground terminal of analog input equipment and the 0V terminal of power supply.

### MF (multi functional ) input

MF (multi functional) input activates when connected to GND(−) for NPN type, and when connected to (+) for PNP type.

1) Connect the lead wires correctly. The analog output wire must not be in contact with any other wire. Do not turn on the power while wiring.
2) The blue wire（0V）and shield wire（analog GND）are internally connected. Use the blue wire（0V）for the power supply and use the shield wire（analog GND）for analog output.

## Specifications

### ●Specifications of Measuring Range

| Type | | | | | | | |

### ●Specifications of Output

| Type | | Dual output | Analogue | Voltage | RS422 |
|---|---|---|---|---|---|
| | | CD33- ① | CD33- ② | CD33- ③ | CD33- ④ |
| Supply Voltage | | DC12〜24V (+10%/−5%) | | DC18〜24V (+10%/−5%) | DC12〜24V (+10%/−5%) |
| Current Consumption | | 55mA max.（DC24V） | 85mA max.(DC24V) including analog output value | 55mA max.（DC24V） | |
| Outputs | Control output Q1 | NPN/PNP Open collector 100mA max. /30V DC (Residual voltage 1.8 V max.) | | | — |
| | Control output Q2 | NPN/PNP Open collector 100mA max. /30V DC (Residual voltage 1.8 V max.) | | | |
| | Analog output | — | 4〜20mA | 0〜10V | — |
| Interface | | — | | | RS422 |
| Connection | Cable type *4 | φ5 5core 2m cable(PVC)  AWG24 | φ5 6core 2m cable(PVC)  AWG24 | | φ5 8core 2m cable(PVC)  AWG24 |
| | Connector type | M12  8pin | | | |

*1 Defined with center strength 1/e2(13.5% ). There may be leak light other than the specified spot size.
The sensor may be damaged when there is a highly reflective object around the targets.
*2 Averaging: 64(High resolution), Sampling period:500μs, Object: white ceramic.
*3 Middle of measuring range, Object: white ceramic.
*4 Diameter of min bend cable is 40mm.

## Installation

Install the sensor and adjust the light spot onto the measuring point so that the distance indicator turns ON ( orange ) at the middle of measuring range.
Use M4 screw (tightening torque need to be under 0.8N・m).

Distance indicator shows orange when object exists in the middle of measuring range

8.2    43.2    47.5

optical axis

Middle of measuring range

Surface of the object.

(unit:mm)
・Adjust the sensor position so that  it is set parallel to the surface of object obtain reliable measurement (see above).
・If there is any foreign object around the spot that is glossier than the measuring object,  it may cause incorrect measurement.

| (far green) | Object is some far of range. | Far side of green LED lights up |
| (middle orange) | Object is middle of range. | Middle of orange LED lights up |

## Select Function
●Teach mode
①Press the Select button more than 5 seconds.

Select   >5sec.
②Teach indicator lights up showing that Run status changes to Teach status.

Run  Teach   ⇒   Run  Teach
③Function indicator lights up.

4mA
Select
20mA
ex.)A type

④Select function by pressing Select button.

4mA
Select   Push one time
20mA
ex.)A type

⑤Adjust or select value of function you need by pressing Set button.

Set   Push one time

⑥Then return to RUN by pressing by pressing Select button continuously 5 seconds.

●Special Setting  mode
①Press simultaneously both the Select button and Set button for 5 seconds.

Select + Set   >5sec.
②Both Run and Teach indicators come up.

Run  Teach   ⇒   Run  Teach

③Function indicator Q1 lights up.
　※Q2 lights up when it's RS422 type.

Q1
Q2
ex.)A type

④Select a function by pressing Select button.

Q1
Select   Push one time
Q2
ex.)A type

⑤Adjust or select the function by pressing Set button.

Set   Push one time
⑥Then return to RUN by pressing by pressing  Select button and Set button continuously
　5 seconds.

・Control output stops during teaching and setting period while Analog output works.

## Reset the presettings

Turn on the power by pressing Select button and Set button at the same time and keeping them pushed continuously 5 seconds. Then make sure if all the indicator blinks 3 times to confirm cancel of all presettings.

## Functions

**●Special setting mode function**

| Functions | Functions indicated | Details | Settings and Adjustments | Initial value |
|---|---|---|---|---|
| Analog output when reflection is too high/low | Q1 | Set Analog output when impossible to measure due to too high/low reflection.. <br>Blink Once  : Analog output is fixed at about 22mA(about 11V ). <br>Blink twice  : The last value is fixed and maintained, | ①Push the Select and set button at same time for more than five seconds to enter Special setting mode <br>②Push the Select button and let Q1 indication turn on. <br>③Choose the function by pushing Set button. <br>④Push the Select and set button more than five seconds and to return to Run mode. | Analog output is fixed at about 22mA(about 11V ). |
| One shot trigger | MF | One shot trigger is possible to select through external input. <br>On  :One shot trigger <br>Blink Once  : Laser OFF <br>Blink twice  : Remote teaching <br>Blink three times  : Sample Hold | ①Push the Select and set button at same time for more than five seconds to enter Special setting mode <br>②Push the Select button and let MF indication turn on. <br>③Choose the function by pushing Set button. <br>④Push the Select and set button more than five seconds to return to Run mode. | Laser OFF |
| Sampling period | Avg | Sampling period setting <br>Blink Once   : 500μs <br>Blink twice   : 1000μs <br>Blink three times  : 1500μs <br>On  : 2000μs | Shorter sampling period increases the response and longer sampling period enhances the sensitivity. High response | ①Push the Select button more than five seconds to enter Teach mode. <br>②Push the Select button and let Avg. indication turn on. <br>③Choose the function by pushing Set button. <br>④Push the Select and set button more than five seconds to return to Run mode. | 500μs <br>750μs(CD33-250) |

marks)

en the Teach mode / special setting mode it returns to RUN if no operation in given for 60 seconds.
Self-diagnosis output comes at the time of (1) laser stop (2) saturation by mirror-like object or (3) low sensitivity.
This function does not work when you set the output of Q2. Reset the product when you want to use
Self-diagnosis again.

## Remote teaching

Remote Teaching is possible through External Input. Input time of Remote
Teaching means change of settings.

| Input time | Item |
|---|---|
| 70 - 130ms | The first point of span |
| 170 - 230ms | The second point of span |
| 270 - 330ms | Q1: One point teaching<br>The second point of two points teaching must be completed in one minute with same value as the first point. |
| 370 - 430ms | Q1: One point Reverse Teaching |
| 470 - 530 ms | Q2: One point teaching<br>The second point of two points teaching must be completed in one minute with same value as the first point. |
| 570 - 630 ms | Q2: One Point Reverse Teaching |
| 670 - 5000ms | Offset* |
| 5000ms and more | Offset cancel |

*The current measurement value will be the central position of the measured analog value
by making offset. (A: 12mA / V: 5V)

## Communication

### ●Specification

| Communication method | RS422 |
|---|---|
| Synchro system | Asynchronous |
| Baud rate | 9600/19200/38400/76800 bps * |
| Transmission code | ASCII |
| Data length | 8 bit |
| Stop bit length | 1 bit |
| Parity check | Nil |
| Data classification | STX·ETX |

* Baud rate : 9600bps at factory set

### ●Communication Procedure

When PC sends a command to CD33 it sends back a response to the PC.
In principle one response is given to one command. When sending a command,
make sure if you receive the response to the previous command.

PC ── Command ──────── Command ──
CD33 ─────── Response ───────

* Avg indication will turn on whenever a
command response comes.

### ●Transmission Data Format (Command)

Reading out Setting/Measurement Value/Output Status

| 02H | | 03H |
|---|---|---|
| STX | COMMAND | ETX |
| 1 | 2 | 3 |

1 The code showing the head of transmit data (02H).
2 Selects the command to transmit.
3 The code showing the completion of transmit data (03H).

Writing the setting

| 02H | | 20H | | 03H |
|---|---|---|---|---|
| STX | COMMAND | SPACE | COMMAND | ETX |
| 1 | 2 | 3 | 4 | 5 |

1 The code showing the head of transmit data (02H).
2 Selects the command to transmit.
3 Shows the separation between Command and Command (20H).
4 Set the Setting/Measurement Value/Output Status.

### ●Incoming Data Format (Response)

| 02H | | 03H |
|---|---|---|
| STX | RESPONSE | ETX |
| 1 | 2 | 3 |

1 The code showing the head of incoming data (02H).
2 The response data is set to the transmitted command.
3 The code showing the completion of incoming data (03H).

The following four responses are for the written commands:
〉(3EH)          : Writings completed
? (3FH)          : Writings rejected due to wrong command, etc.
(Numerical value)  : Measurements or settings

Continuous readout of measurement value
Readout the measurements continuously at "START_MEASURE"
command. The response of this case never has STX, ETX. CR(0DH) is
inserted between the measurements.
(ex.)
  85.0000〈CR〉85.0001〈CR〉85.0···

Sure to use the command "STOP_MEASURE" to stop the continuous
reading. Any other command will be valid until the stop command is set.
Continuous reading will not be activated simultaneously.

### ●Command Table

| | Command | type* | Initial value | Description | Exa |
|---|---|---|---|---|---|
| Read the measurements | START_MEASURE | CR | - | Start continuous reading of measurements | 85.0000[CR]85 |
| | STOP_MEASURE | - | - | Stop continuous reading of measurements | [STX]〉[ETX] |
| | MEASURE | R | - | Read the measurements | [STX] 85.0000 |
| | START_MEASURE_S | CR | - | Start continuous reading of measurements and sensitivity *1 | 85.0000 121[C |
| | STOP_MEASURE_S | - | - | Stop continuous reading of measurements and sensitivity *1 | [STX]〉[ETX] |
| | MEASURE_S | R | - | Read the measurements and sensitivity | [STX]85.0000 |
| Q2 setting | START_Q2 | CR | - | Start continuous Q2 output | ON[CR]ON[CR |
| | STOP_Q2 | - | - | Stop continuous Q2 output | [STX]〉[ETX] |
| | Q2 | R | - | Read Q2 output | [STX]ON[ETX] |
| | Q2_HI | R | - | Read actual setting of Q2 Hi | [STX]105.0000 |
| | Q2_LO | R | - | Read actual setting of Q2 Lo | [STX]65.0000[ |
| | Q2_HI()60.000 | W | - | Set Q2 Hi for example to 60mm *2 | [STX]〉[ETX] |
| | Q2_LO()40.000 | W | - | Set Q2 Lo for example to 40mm *2 | [STX]〉[ETX] |
| | Q2 DEFAULT | R | ● | Set Q2 to default (Self-diagnosis output) | [STX]〉[ETX] |
| Avg. setting | AVG | R | - | Read setting of the response time | [STX]FAST[ET |
| | AVG()FAST | W | - | Set response time to Fast | [STX]〉[ETX] |
| | AVG()MEDIUM | W | ● | Set response time to Standard | [STX]〉[ETX] |
| | AVG()SLOW | W | - | Set response time to High resolution | [STX]〉[ETX] |
| Multi functional input | MF | R | - | Read setting of multi functional inputs | [STX]LSR_OFF |
| | MF()LSR_OFF | W | ● | Set to Laser off (default) | [STX]〉[ETX] |
| | MF()SH | W | - | Set to Sample Hold | [STX]〉[ETX] |
| | MF()TEACH | W | - | Set to external Teach | [STX]〉[ETX] |
| | MF()OS | W | - | Set to one shot by trigger or command | [STX]〉[ETX] |
| Alarm setting | ALARM | R | - | Read actual setting for Alarm | [STX]CLAMP[ |
| | ALARM()CLAMP | W | ● | Set Alarm to clamp | [STX]〉[ETX] |
| | ALARM()HOLD | W | - | Set Alarm to Hold | [STX]〉[ETX] |
| | RESET | W | - | Reset all settings to default settings | [STX]〉[ETX] |
| | ON | W | - | Set MF active | [STX]〉[ETX] |
| | OFF | - | - | Set MF inactive | [STX]〉[ETX] |
| External Teach | ON()500 | W | - | Q2: One point teaching<br>The second point of two points of teaching ; Complete input of the same command within one minute. | [STX]〉[ETX] |
| | ON()600 | W | - | Q2: One Point Reverse teaching | [STX]〉[ETX] |
| | ON()700 | W | - | Offset *8 *9 | [STX]〉[ETX] |
| | ON()5000 | W | - | Offset cancel | [STX]〉[ETX] |
| | SAVE | R | - | Save all setting | |
| | WRITE()xxxx | W | - | Write all setting *3 | |
| | SERIAL_NO | R | - | Read Serial number *4 | [STX]xxxxxxxx |
| | USER DATA | R | - | Read user Data | [STX]xxxxxxxx |
| | USER_DATA()xxx | W | - | Write user data (max. 16 byte ASCII) *5 | [STX]〉[ETX] |
| | BIT_RATE | R | - | Read actual setting for Bit rate | [STX]9.6K[ETX |
| | BIT_RATE()9.6 | W | 9.6 | Set baud rate *6 | [STX]〉[ETX] |
| | SAMPLE_RATE | R | - | Read actual setting for sampling period | [STX]500US[E |
| | SAMPLE_RATE()500 | W | 500 | Set sampling period *7 | [STX]〉[ETX] |

Command type = CR: Continuous reading command, R: Reading command, W: writi
The space (20H) is shown as ( ) for convenience.
*1 Sensitivity is automatically adjusted between the value of 0 and 223. (0 as Low limit,
   Manual setting of sensitivity is not available.
*2 Input the distance to set by mm. Possible to input decimal four columns, but the set
   over the detection performance becomes invalid.
*3 Write the values in turn as they have been read out in the SAVE.
*4 Reads out the serial numbers (11 digit) that is printed in the product label on the bac
*5 Up to 16byte by ASCII code
*6 Baud rate is 9.6kbps at factory set. Choose baud rate among( 9.6/19.2/38.4/57.6/76
*7 Sampling period is 500μs at factory set. Choose sampling period among ( 500/1000
   (CD33-250 750/1000/1500/2000μs 750μs at factory set)
*8 While Offset is activated, it will output displacement data including minus sign for the

M12 8pin connector
